

Important Instructions for The AI Project Demo

- All the team members should present during the demo.
- It is a team evaluation.
- The evaluation is divided into **two** parts (i) **viva (Q & A session)** (ii) **Execution and demo** - each portion will be taken a maximum of **5 minutes** (Total 10 min).
- Every team has to bring **one copy of printout** of the research paper that you have implemented.
- On top of the research paper print copy, you have write your **team/group number, team member's names and roll numbers**.
- you have **highlight portion/contents** of the of the research that you have **implemented** as part of the project.
- you have to **submit** the print copy after evaluation.
- During the Execution and demo, you have to **be ready** with your **code** and the results/outputs immediately without any dely.
- In the Execution and demo portion, **correctness** of your code, **output/results** and **GUI/Framework** will be verified.
- The evaluation will be by default **group wise** order.
- If the group members are **not ready/present** when we call, we will go to next batch. Once if you **miss** your turn, you will get chance at the **end of all teams**.
- On Day 1 we will try to finish as much as possible. The remaining batches evaluations will be on Day 2.
- At a time **20 teams are allowed** inside the evaluation hall (G07).
- Same rules are applicable for backlog students.
